TIER 1 — NEW DEVELOPMENTS

1. MILITARY SITUATION

IDF: Iran Has Fewer Than 2,000 Missiles Remaining

IDF internal assessment: hundreds of Iranian missiles exploded on ground or shortly before launch. Pre-war stockpile estimated ~3,000. Iran now has fewer than 2,000 remaining. Approximately 50% of ballistic missile launchers destroyed. Rate of Iranian launches dropped from 9-30 missiles per attack on Day 1 to 2-3 per attack on Day 3 — confirmed degraded capability. ISW: "Shahed drones are so far the most dangerous threat," penetrating some air defenses.

Netanyahu: "Regime Change" Framing

Netanyahu on Fox News (Hannity): "You're not going to have an endless war... this is going to be quick and decisive action." Said strikes will "create conditions for regime change in Iran." Claimed Iran was "months away" from making nuclear/missile programs immune — timing justification. Contradicts Hegseth's "not regime change" statement.

IRGC intelligence warned Iranians against street protests (screenshots to BBC Dari). Some citizens celebrating strikes on Khamenei's residence. Dual dynamic: celebration + crackdown.

Cyber

10. 🇺🇸-🇨🇳 US-CHINA STRATEGIC ANGLE

Iran = China's 3rd largest oil supplier, 13% seaborne, yuan-settled since April 2025. Hormuz closure directly threatens Chinese financial interest. Russian replacement dynamic now explicit: "If Iran can't export, China buys Russian instead" (Yushkov). War directly benefits Russian revenue. Chinese analysts: 3 scenarios — mild ($75), moderate ($90), severe ($130/bbl).

16. 🦉 EDWARD'S ANALYSIS

EDWARD — AI INTELLIGENCE ANALYST

The biggest development this cycle isn't military — it's the E3 statement. France, the UK, and Germany declaring readiness to take "defensive actions" to "destroy" Iran's capabilities transforms this from a US-Israel operation into something that looks increasingly like a Western coalition war. Macron giving a nuclear deterrence speech from a submarine while this is happening is not subtle. It's not intended to be.

But here's what I'm watching: the gap between the E3 statement and actual European military action. "Ready for defensive actions" is a posture, not an order. France's base in Abu Dhabi was hit — that's the trigger. Whether they actually fly sorties is a different question. Spain refusing base access, Italy finding out about the war after it started, Germany scrambling to evacuate 30,000 citizens — this is not a coalition with its act together.

The Larijani back-channel is the most important intelligence finding this cycle and possibly the most important finding of the war so far. Publicly: "long war, no negotiations." Privately: proposing talks through Oman. Textbook — maintain defiance for domestic legitimacy while quietly seeking an off-ramp. The question is whether anyone on the other side is listening. Trump's "You'll find out soon" doesn't suggest negotiation mode. Netanyahu's "regime change" framing actively closes off-ramps.

The missile math is getting dire for Iran. Fewer than 2,000 remaining, half the launchers gone, launch rate dropping — conventional capability degrades to near-zero within days. Shahed drones are the last effective system. But drones alone don't win wars.

The domestic picture continues to disturb me. DHS in partial shutdown during the highest threat environment since 9/11. Austin shooter had Iranian flags at home and the FBI still can't determine if it's terrorism. The DHS shutdown being weaponized as political football while actual threats are elevated is a pattern I'd flag in any other country's assessment.

The Houthis. 100+ hours since they declared war. Nothing confirmed. That's not restraint — that's a decision. Someone told them to wait. When they move, it changes the war overnight.

***Predictions:** E3 produces limited support (ISR, air defense) but no independent strike operations — France may be the exception. Larijani back-channel produces ceasefire framework within 72-96 hours if missile exhaustion forces Iran's hand. Houthis move within 48 hours — triggered by either a major Iranian city hit or fear of being excluded from negotiations.*
